

- LEGEND**
- III Louvre / acoustic louvre panel
 - D Personnel door
 - Mezzanine floor level (internal)
 - I Exhaust silencer stack (diagrammatic)
 - ▽ Level marker
 - zz Break — intervening site omitted

- NOTES**
- Elevation uses the real north-south (site-Y) coordinates of Hall 1, the MEP spine and the generator compound — refer PDC-DWG-001 for plan locations.
 - MEP spine and mezzanine over all immediately north of the hall and are sized for the full 10 MW IT load in Section 1.
 - Generator compound acoustic enclosure, 6.0 m to eaves, houses 8 No. 2.5 MVA standby generators with exhaust silencer stacks above roof.
 - Precast concrete wall panels, vertical joints at 3.0 m centres, typical to the hall and spine; enclosure louvre panels at wider centres.
 - Gap between the MEP spine and the generator compound is handstanding / cable route, not built — refer PDC-DWG-001.
